PROFESSIONAL SUMMARY

Full Stack Software Engineer with nearly 2 years of professional experience building and optimizing scalable web and mobile applications using JavaScript-based stacks (MERN/PERN). Proficient in React, Node.js, Express, PostgreSQL, MongoDB, and Flutter, with hands-on experience delivering end-to-end features across B2B and B2B2C platforms. Skilled in REST API development, CI/CD pipelines, clean architecture, and cross-functional collaboration. Demonstrated track record of improving system performance and delivering production-grade software.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Dart, SQL, HTML5, CSS3, Kotlin

Frontend: React.js, React Native, Flutter, Redux Toolkit, Redux Saga, Tailwind CSS, Material-UI (MUI), Bootstrap

Backend: Node.js, Express.js, REST API Development, PostgreSQL, MongoDB

Stacks: MERN Stack, PERN Stack

Tools & Platforms: Git, GitHub, Bitbucket, CI/CD Pipelines, QuickBooks API, Google Maps API

Practices: Clean Architecture, Agile, RESTful API Design, Database Optimization, ERP Systems

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer

July 2024 – Present

Text Private Ltd | Karachi, Pakistan

- Developed BusCaro, a cross-platform mobile application (Flutter) serving B2B and B2B2C markets, integrating real-time Google Maps live tracking and an in-app chat support system.
- Optimized PostgreSQL database queries and Node.js backend APIs, reducing API response times and improving overall system performance.
- Implemented CI/CD pipelines to streamline deployment workflows and reduce release cycle times.
- Built and deployed Nets4You, a full-featured ERP management system with a Node.js backend and React frontend, integrating QuickBooks API for automated invoicing and financial reconciliation.
- Integrated password reset flows, mailing services, and role-based access control (RBAC) across frontend and backend systems.
- Designed comprehensive financial reporting dashboards for BusCaro Admin and Client web portals using React, Redux Toolkit, and Redux Saga.
- Applied native mobile functionalities using Kotlin and adhered to clean architecture principles for long-term maintainability and scalability.

KEY PROJECTS

BusCaro – Captain & Passenger Mobile App

Stack: Flutter, Dart, Kotlin, Google Maps API

- Developed and integrated REST API solutions for B2B and B2B2C features using Flutter.
- Embedded real-time GPS tracking via Google Maps SDK and shipped in-app chat support.
- Established CI/CD pipeline and followed clean architecture principles for scalable code organization.

BusCaro – Admin & Client Web Portal

Stack: React, Redux Toolkit, Redux Saga, Material-UI (MUI), CSS

- Built complex financial reporting modules for professional record tracking and data visualization.

- Managed global application state and asynchronous API calls using Redux Toolkit and Redux Saga.
- Developed and integrated responsive UI components with Material-UI and custom CSS.

BusCaro – Backend API

Stack: Node.js, Express.js, PostgreSQL

- Architected scalable, maintainable RESTful APIs in Node.js with clean separation of concerns to support long-term extensibility across B2B and B2B2C services.
- Tuned complex PostgreSQL queries to distribute load efficiently, eliminating bottlenecks and sustaining performance under high-traffic conditions.
- Encapsulated business logic into isolated service layers, safeguarding system reliability and preventing failures from propagating across modules.

Nets4You – ERP Management System

Stack: Node.js, Express.js, PostgreSQL, React, Redux, Tailwind CSS, QuickBooks API

- Engineered and deployed robust server-side REST APIs using Node.js and PostgreSQL.
- Built a fully responsive frontend using React and Redux, ensuring seamless state management and a smooth user experience across all devices.
- Designed a clean, modern UI with Tailwind CSS, simplifying complex ERP workflows for end users.
- Integrated QuickBooks API to synchronize financial data and automate invoicing and reconciliation processes.
- Applied database best practices ensuring data integrity, availability, and security.
- Implemented mailing services and password reset functionality across frontend and backend.

EDUCATION

Bachelor of Science – Computer Science

Sep 2020 – Jul 2024

Muhammad Ali Jinnah University | Karachi, Pakistan

- President's Honor List – Fall 2023
- Dean's Honor List – Spring 2024
